

COVID-19 Vaccines: Myth Versus Fact (Part-1)

MYTH: COVID-19 vaccines are not safe.

FACT: Both the Moderna and Pfizer vaccines have 94% and 95% effectiveness in preventing COVID-19. More than 70,000 individuals participated in the studies for both.

MYTH: COVID-19 Vaccines were rushed.

FACT: There have been no shortcuts in the development process. The process has been quicker as a result of companies holding trials at the same time. Vaccine manufacturers have pledged to the world to work together.

MYTH: Vaccines that use mRNA (Phizer/BioNTech) will alter my genetic makeup.

FACT: mRNA is not able to alter or modify a person's genetic makeup and never enters the nucleus of the cell.

MYTH: You can get COVID-19 from a COVID-19 vaccine.

FACT: COVID-19 vaccines will not give you COVID-19. Both Phizer-BioNTech and Moderna vaccines do not use live viruses.

MYTH: Other vaccines, like the flu shot, will prevent COVID-19.

FACT: Other vaccines, such as those for flu or measles, will not protect you from COVID-19. Only vaccines specifically designed to prevent COVID-19, once approved by the FDA, will prevent it COVID-19.

MYTH: COVID-19 vaccines will implant tracking microchips in people.

FACT: No vaccine injections or nasal sprays contain microchips, nanochips, or devices that would track or control your body.

MYTH: Vaccines cause autism.

FACT: Studies conducted all over the world show that there is **no connection** between autism and vaccines.
