

KENT CITY HEALTH DEPARTMENT

ENVIRONMENTAL HEALTH-

FOOD SAFETY

The mission of the program is to protect and improve the health of consumers by assuring foods are safe, and are not adulterated, misbranded, or falsely advertised. Inspections are conducted in licensed food service operations, restaurants, taverns, and retail food establishments to ensure that sanitary standards are used to protect the public's health. Additional food safety training is available to licensed food services or to whomever is interested.

PUBLIC SWIMMING POOL AND SPA PROGRAM

Routine inspections are performed to monitor water quality as well as physical facility and equipment that will protect the public from disease and potential accidents.

MOSQUITO CONTROL PROGRAM

The Mosquito Program consists of four components:

1. Education and Source Reduction. This component consists of cultural practices such as applying repellents and reducing mosquito breeding sites.
2. Surveillance entails trapping of mosquitoes to determine if the encephalitis virus is present.
3. Larviciding is the daytime treatment of standing water areas that breed mosquitoes.
4. Adulticiding is the evening spraying of residential streets to reduce the number of adult mosquitoes.

HOUSING

The Environmental Health and Housing Maintenance Program ensures that minimum structural and sanitation standards are achieved for multi-use structures and their surroundings.

PUBLIC HEALTH NUISANCES

All written public health complaints are investigated to eliminate environmental conditions that may adversely affect human health, safety, or well being.

TATTOO AND BODY PIERCING PROGRAM

Routine inspections are conducted in any business offering tattoo or body piercing services to ensure that establishments meet the general safety and sanitation standards.

ANIMAL BITE INVESTIGATIONS

All reported animal bites are investigated in order to protect the public from a possible rabies outbreak.

VITAL STATISTICS-

BIRTH AND DEATH RECORDS

All legal records collected by the Kent Office of Vital Statistics are the data source for many important statistical measures used in public health. All birth and death records dating back to 1909 are maintained for the City of Kent and surrounding Portage County and are available to the public.

NURSING SERVICES-

COMMUNICABLE DISEASE

The City of Kent Health Department works in conjunction with the Centers for Disease Control and Prevention and the Ohio Department of Health to prevent the spread of communicable diseases.

IMMUNIZATION CLINIC

A children's immunization clinic is conducted every 3rd Wednesday of each month at the Health Department from 3:00-5:00pm. No appointment is necessary. All immunizations are provided at a reduced rate or may be free in certain circumstances.
